

Nr. 1: **Maximize** the Book in full screen!

**B)** Go to any page you want & any CHAPTER you want.

1) Go to any page you want.

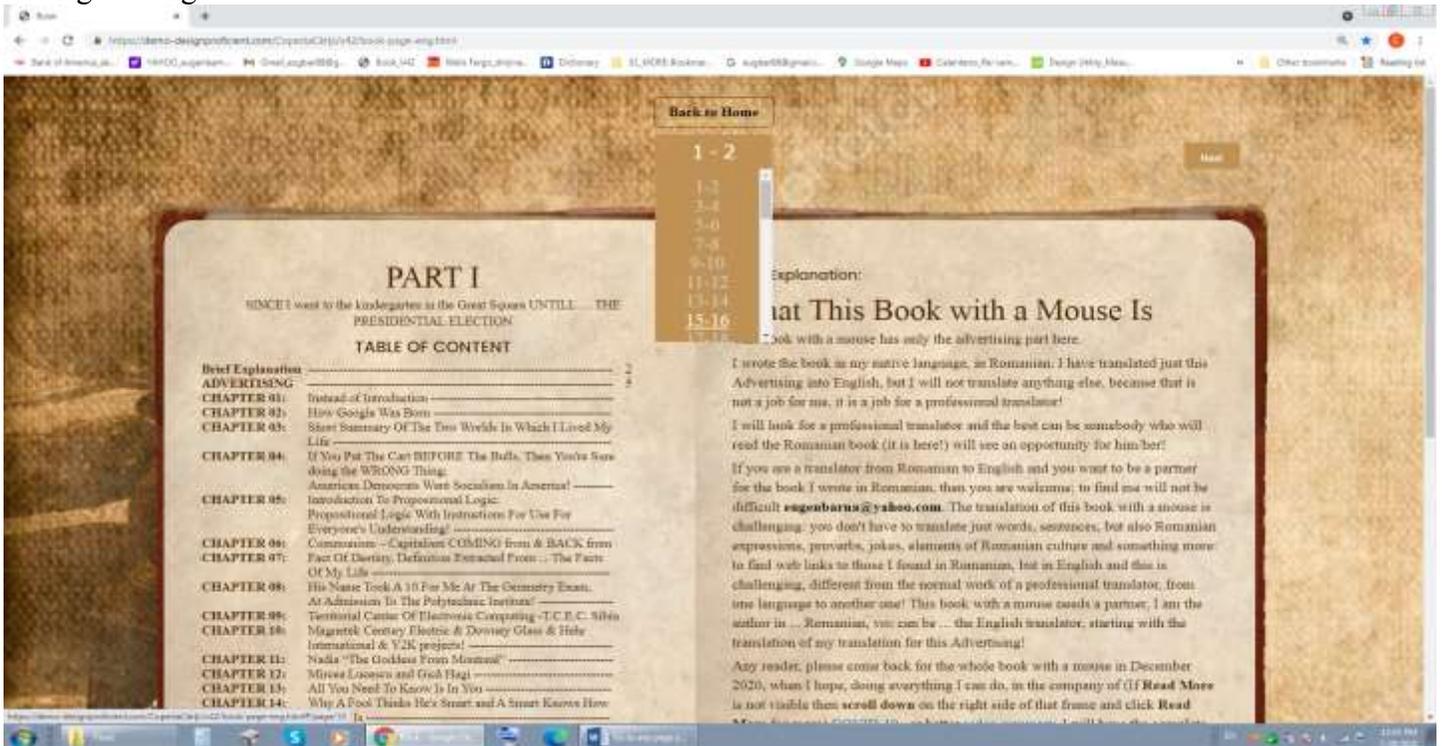

Take *the mouse* [I will call the mouse prompt ... *the mouse*], where I took him now, under **1 - 2**:

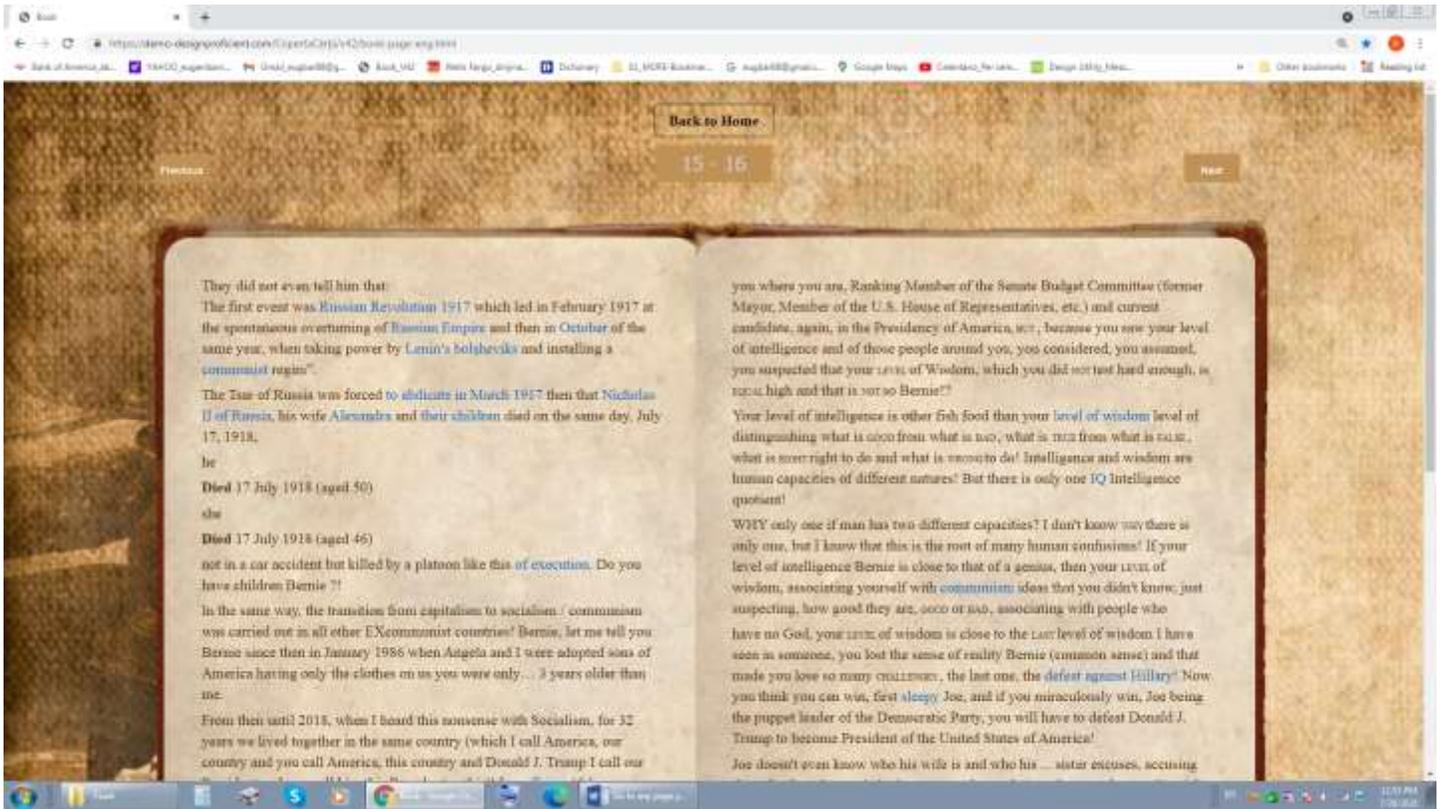

To the right of the list of page numbers see the SCROLL column [Computers: to move (text) up, down, or across a display screen, with new text appearing on the screen as old text disappears] which allows you to walk up and down the page numbers as much as you want!

Now move the mouse to the Page where you want to jump and **click!**

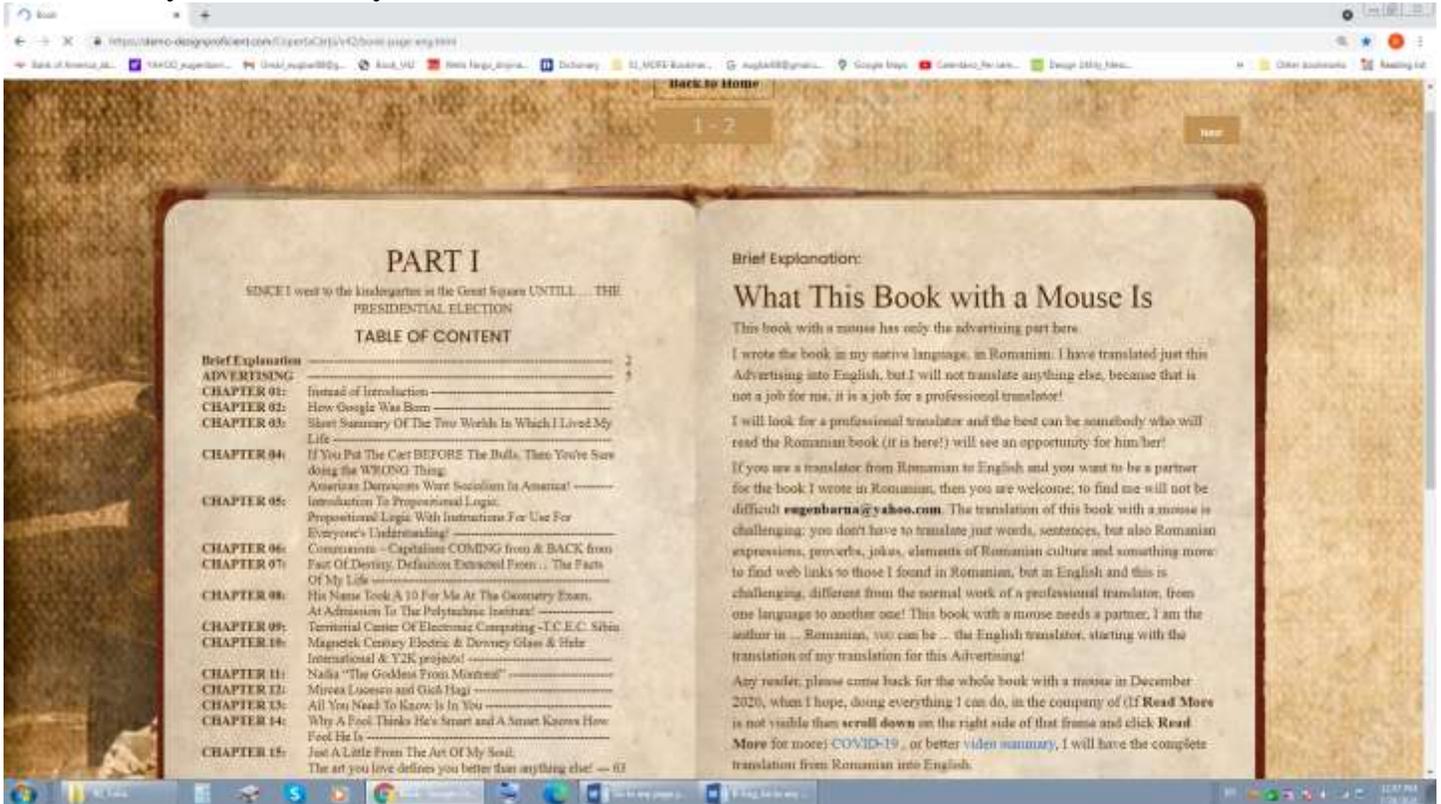

Let's go to Page 16:

and click on 15-16:

2) Go to any CHAPTER you want.

There are two possible ways:

- For each existing CHAPTER there is a link to the Page where the CHAPTER begins. Move the mouse over the link and **click**.
- For each existing CHAPTER, the Page where the CHAPTER starts is written at the end of the line. Go to the Page written there as explained above at 1) **Go to any Page you want**.

For each CHAPTER that is not yet on the Website a tootip will show you that is **COMING SOON**.
